

## Dear Colleagues

The organizing committee is delighted to invite you to participate in the Joint Meeting of the 1<sup>st</sup> Africa International Biotechnology & Biomedical Conference and the 8<sup>th</sup> International Workshop on Approaches to Single-Cell Analysis that will take place from 10<sup>th</sup>-12<sup>th</sup> September, 2014 at the Safari Park Hotel in Nairobi city, Kenya.

Single-cell analysis is a rapidly growing biotech field with wide ranging applications in medicine and drug discovery. This year's meeting is coming after a highly successful one held in Stanford in September last year and we hope it will continue the steady progress that these workshops have had over the last decade.

Reflecting on the uniqueness of the location, this year's meeting will focus on the application of single-cell analysis and related biomedical approaches to detection, therapy and prevention of diseases and infections. We have open opportunities for **poster** presentations. If you are interested, please send us a **one page abstract** to the addresses below. Selected abstracts will be considered for oral presentation at the relevant plenary sessions. Please note that presentation at the plenary sessions will be by invitation only.

We are blessed to have as our speakers some of the most distinguished scientists in the field. Please join us for 2.5 days of fantastic scientific exchanges and discussions in an equally fantastic location. The weather in Nairobi in September is quite pleasant and you can look forward to great African hospitality during your stay in Kenya.
